

Author Index to Volume 21 (1988)

(The issue number is given in front of the page numbers.)

- | | |
|---|--|
| Agarwal, R.P. , Monotone convergence of iterative methods for (n, p) and (p, n) boundary value problems. (2) 223–230 | Jacobsen, L. , Remarks to a definition of convergence acceleration illustrated by means of continued fractions $K(a_n/1)$ where $a_n \rightarrow 0$ (1) 101–110 |
| Brankin, R.W. , Gladwell, I. and Shampine, L.F. , Starting BDF and Adams codes at optimal order (3) 357–368 | Kalker, T.A.C.M. , see Van Laarhoven, P.J.M. (3) 369–375 |
| Bunse-Gerstner, A. and Gragg, W.B. , Singular value decompositions of complex symmetric matrices (1) 41–54 | Karageorghis, A. , A note on the Chebyshev coefficients of the general order derivative of an infinitely differentiable function (1) 129–132 |
| Chawla, M.M. , Subramanian, R. and Sathi, H.L. , A fourth-order spline method for singular two-point boundary-value problems (2) 189–202 | Karageorghis, A. , A note on the Chebyshev coefficients of the moments of the general order derivative of an infinitely differentiable function (3) 383–386 |
| Cloot, A.H.J. and Herbst, B.M. , Analytical instability of the Klein–Gordon equation (1) 17–26 | Klempous, R. , Kotowski, J. , Nikodem, J. , Olesiak, M. and Ulasiewicz, J. , Some models for water distribution systems (3) 257–269 |
| Cuyt, A. and Verdonk, B. , Multivariate reciprocal differences for branched Thiele continued fraction expansions (2) 145–160 | Kotowski, J. , see Klempous, R. (3) 257–269 |
| Davies, A.R. , see Phillips, T.N. (2) 173–188 | Lu, L.C. and Wang, Y. , A variable transformation method for solving linear absolute value objective function problems with linear constraints (1) 111–113 |
| De Bruin, M.G. , Simultaneous partial Padé approximants (3) 343–355 | McNamee, J.M. , A comparison of methods for terminating polynomial iterations (2) 239–244 |
| Draux, A. , On the non-normal Padé table in a non-commutative algebra (3) 271–288 | Ng-Stynes, M.J. , O’Riordan, E. and Stynes, M. , Numerical methods for time-dependent convection-diffusion equations (3) 289–310 |
| Dunham, C.B. , Approximation with one (or few) parameters nonlinear (1) 115–118 | Nikodem, J. , see Klempous, R. (3) 257–269 |
| Ehrenmark, U.T. , A three-point formula for numerical quadrature of oscillatory integrals with variable frequency (1) 87–99 | Olesiak, M. , see Klempous, R. (3) 257–269 |
| Gladwell, I. , see Brankin, R.W. (3) 357–368 | O’Riordan, E. , see Ng-Stynes, M.J. (3) 289–310 |
| Goovaerts, M.J. , see Grosjean, C.C. (3) 311–331 | Phillips, T.N. and Davies, A.R. , On semi-infinite spectral elements for Poisson problems with re-entrant boundary singularities (2) 173–188 |
| Grafton, R.B. , see Sternberg, R.L. (2) 213–222 | Prevost, M. , Stieltjes- and Geronimus-type polynomials (2) 133–144 |
| Gragg, W.B. , see Bunse-Gerstner, A. (1) 41–54 | Sathi, H.L. , see Chawla, M.M. (2) 189–202 |
| Grosjean, C.C. and Goovaerts, M.J. , The analytical evaluation of one-dimensional Gaussian path-integrals (3) 311–331 | Sen, S.K. , see Venkaiah, V.Ch. (1) 27–40 |
| Herbst, B.M. , see Cloot, A.H.J. (1) 17–26 | Shampine, L.F. , see Brankin, R.W. (3) 357–368 |
| Ifantis, E.K. and Siafarikas, P.D. , Bounds for the first positive zero of a mixed Bessel function (2) 245–249 | Sharma, R.K. , Numerical solutions to radial form of transistor equations (3) 377–381 |
| Ioakimidis, N.I. , The successive approximations method for the airfoil equation (2) 231–238 | Siafarikas, P.D. , see Ifantis, E.K. (2) 245–249 |
| | Soh, B.C. , Fourier series of B-splines (1) 125–127 |
